Baldwin Park Unified Elementary School Hosts Inaugural STEAM Night

Feb. 1 event will feature 12 activity stations for students and their families

WHAT: Baldwin Park Unified's Foster Elementary School expects more than 100 students to attend its first STEAM Night, featuring 12 activity stations that will challenge students to think creatively and collaboratively in science, technology, engineering, art and math fields.

The event expands on two previous annual STEM nights by adding art to the mix.

Family members are invited to take part with their children in such activities as constructing rainbow spinners, operating a gyrocopter, making unicorn slime, crafting a boat that will float, building a spaghetti tower, creating colors and analyzing shapes.

WHEN: 5 to 6:30 p.m. Thursday, Feb. 1

WHERE: Foster Elementary School, 13900 Foster Ave., Baldwin Park

DETAILS: The event promotes critical thinking skills on 21st century topics with an eye on preparing students for technologically demanding college majors and career fields. In December, Foster held a Literacy Night to strengthen reading comprehension skills.

Coverage and/or inclusion of this event in your calendar of events is welcomed and greatly appreciated.
